Comanche to Reopen

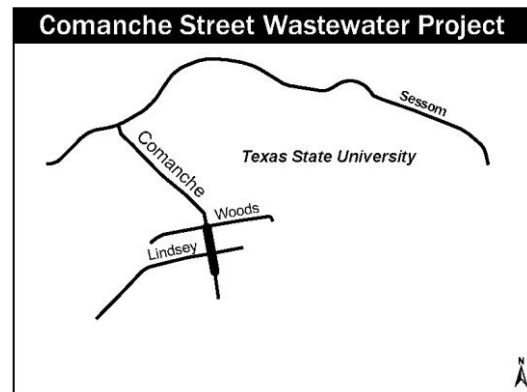

Comanche Wastewater Project Nears Completion

The City of San Marcos plans to reopen Comanche to through traffic by the end of the day on Friday, April 9. The road has been closed since March 29 for the installation of an 8-inch sanitary sewer line.

The project is now substantially complete. The contractor will temporarily repair the pavement and remove traffic control signs to allow access for Tx State buses and the general public.

The roadway will be closed again for an estimated three days at the end of April for final milling, permanent re-paving and striping.

Haley Nelson Construction, LLC, started the project Monday, March 29, with an end date in four weeks. Working an expedited schedule they were able to shorten the closure of this busy street to two weeks.

For more information on the project please call the Capital Improvements Department at 512.393.8130.
